Quality Policy

We, Xi'an SaiNa Biological Technology Co., Ltd. ensure that all our products are fully meet the requirements of our customers at all times. Commitment to the implementation of supporting managerial and business operational systems is essential to realising that goal. To realize our mission we are building an organization that can provide supply chain services that meet the requirements and expectations of our customers.

In order to secure the fulfillment of those requirements and expectations we implement a quality management system that is also suitable to support our operations.

We monitor the development of quality requirements in the market and develop our quality management system with it so it can meet customer requirements at any moment in time.

Management ensures that all employees understand the quality management system and implement the processes defined.

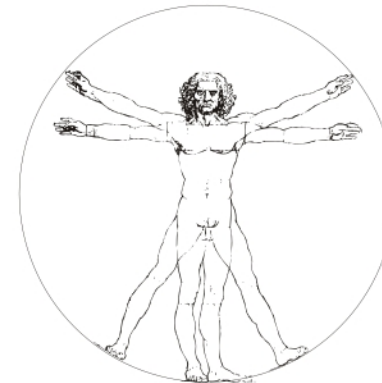

To ensure a proper functioning of the quality management system a quality assurance function has been integrated in the organization. The quality assurance function reports objectively on the functioning of the quality management system and when required intervenes and initiates corrective and preventive actions.
